

Dæmons & Shell Scripts

Shell Script 0-1

```
$ ps - aux
```

Hello dear bolwerk,

We are invited for the Lodgers, a partnership between M HKA, AIR Antwerpen from 2 May – 17 July 2015. Together with Shelbatra Jashari, we are developing within this timeframe a dynamic platform called Dæmons & Shell Scripts.

Daemons are the (background) processes running on your hardware (laptops, smartphones, tablets, ..) constantly active performing certain (maintenance) tasks or providing services. Comparable to the mythical Greek beings, they are constantly present in the background, good and/or evil. Dæmons & Shell Scripts articulates during the Lodgers an embodiment of these 'daemons', literally and metaphorically, singular and plural.

<http://www.oooo.be/daemonsshellscripts>

Which commands and operations enable us to face our dæmons, enlighten and exorcise them?

How can we shed light upon the obscurity where daemons emerge?

How do we bring the unconscious, sleeping and hidden processes to the foreground?

How do make the dæmons lively by using codes, bodies or energies ?

How do we embody these background processes in 'becoming'

- - Verbal / Poetic
- - Physical / Sensual
- - Cellular / Biological
- - Quantum / Metaphysical
- - Alchemical / Mystical
- - Digital / Logarithmic
- -

If you want to be engaged in this dynamic platform, laboratorium, public interface send and upload your feedback, recursive loops, proposals, former experiments, practice-based examples, video's, audio or contextual references in any data format.

We will process and shell script them.

If you happen to be between 2 May – 17 July 2015 near Antwerp ,we can lodge you. If you want to get remotely involved, send us a mail on info@oooo.be. For file transfer we refer to our temporary account on our cloud <http://www.oooo.be/cloud> (login=visitor password=](AVp'9u) (available til end of february)
